

# NewCanvas - Compiled Report Summary

Generated: October 19, 2025

## Overview

This report compiles the project summary and file tree for **react-canvas**. It mirrors the earlier `canvas-summary.html` but includes the full repository tree embedded below.

## Files added (high level)

- `src/components/Login.jsx`
- `src/components/Account.jsx`
- `src/components/Dashboard.jsx`
- `src/components/Courses.jsx`
- `src/components/Files.jsx`
- `src/components/Calendar.jsx`
- `src/components/Inbox.jsx`
- `src/components/History.jsx`
- `src/components/PlannerEmptyState.jsx`

## App changes

`src/App.jsx` was updated to use `react-router-dom` and route to the new components. A simple top navigation was added.

## Project tree (full-tree.json)

The JSON below is the compiled repository tree snapshot used to generate this report.

```
{
  "name": "react-canvas",
  "type": "directory",
  "children": [
    { "name": ".gitignore", "type": "file" },
    { "name": "index.html", "type": "file" },
    { "name": "package.json", "type": "file" },
    { "name": "README.md", "type": "file" },
    { "name": "vite.config.js", "type": "file" },
    { "name": "canvas-summary.html", "type": "file" },
    { "name": "public", "type": "directory", "children": [
      { "name": "vite.svg", "type": "file" }
    ]},
    { "name": "node_modules", "type": "directory", "note": "collapsed - contains installed packages" },
    { "name": "src", "type": "directory", "children": [
      { "name": "App.jsx", "type": "file" },
      { "name": "App.css", "type": "file" },
      { "name": "index.css", "type": "file" },
      { "name": "main.jsx", "type": "file" },
      { "name": "assets", "type": "directory", "children": [
        { "name": "react.svg", "type": "file" }
      ]},
      { "name": "components", "type": "directory", "children": [
        { "name": "Account.jsx", "type": "file" },
        { "name": "Calendar.jsx", "type": "file" },
        { "name": "Courses.jsx", "type": "file" },
```

Download as PDF

```
{ "name": "Dashboard.jsx", "type": "file" },  
{ "name": "Files.jsx", "type": "file" },
```

## Notes and next steps

The components listed are simple placeholders. Possible next steps:

- Wire up the components to a backend API (the server lives in `server/index.cjs`).
- Seed the local DB with PDFs using `server/seed.cjs` (place PDFs in `data/ebooks`).
- Replace `PlannerEmptyState.jsx` with the exact Canvas SVG if you want a pixel-perfect preview.
