

NewCanvas - Summary of added components

Generated: October 19, 2025

Files added

- `src/components/Login.jsx`
- `src/components/Account.jsx`
- `src/components/Dashboard.jsx`
- `src/components/Courses.jsx`
- `src/components/Files.jsx`
- `src/components/Calendar.jsx`
- `src/components/Inbox.jsx`
- `src/components/History.jsx`
- `src/components/PlannerEmptyState.jsx`

App changes

`src/App.jsx` was updated to use `react-router-dom` and route to the new components. A simple top navigation was added.

How to view and save as PDF

1. Open this file in a browser: `file:///.../react-canvas/canvas-summary.html` (or serve it from the dev server)
2. Click the **Download as PDF** button (or press `Ctrl/Cmd+P`) to open the print dialog, then choose "Save as PDF".

Notes

The components are placeholders. I can embed the exact SVG from your Canvas planner HTML into `PlannerEmptyState.jsx`, or implement real authentication and API-backed data. Tell me which you prefer.
